

I understand that a broadcast service known as LPFM may interrupt my, or anyone's, reception of an important radio station "KLOVE".

KLOVE is important to me and many of my friends and co-workers, it helps me and others around the country to keep a positive outlook and remind us of all the good in the world rather than the bad...it would be a terrible thing to lose reception or to see someone's future opportunity to hear the good word coming over the airwaves that may save their marriage, life, sense of wellness, or whatever it would have done for those who could use it if they could hear it.

Please insure that the KLOVE signal is not interfered with if you can.

Thank you,  
Matt Sease
